THE GREAT PYRAMID OF GIZA
Holy Grail of Human Endeavour, or Monument of Messianic Promise?

This draft document is the result of spontaneous hypothetical research
undertaken by the author during the summer of 2025. For all intents and
purposes it should be approached as an organic, loosely-structured body of data
for the benefit of discerning enquiry. It is the earnest intention of the
author, through compelling alpha-numeric concordance to bear testimony of the
following claims:

The Great Pyramid ->

1. is the intellectual property of the Holy Spirit.
2. models the divine orders of Creation.
3. declares Jesus Christ as the Light of the World.
4. in its form portrays laying down, gathering, resurrection, governance.
5. proclaims the Second Coming and the establishment of God's Kingdom on Earth.
6. encodes God's restoration plan for returning the children back to the Father.

∏(su·rd·rv·rr) = 15526012446→57600→210→2
∏(su,cs) = 432

The above ordinal calculation from Genesis 1:1 in the King James Bible equals
411. Remarkably, 411 is 3 * 137 (see the fine-structure constant & the golden
angle). From number 3 we assume the triune Godhead of Father, Son, and the Holy
Spirit (the 7 spirits of God, Revelation 4:5). We know from Hebrew gematria 13
for אֶחָד "One" as spoken in the Shema (Deuteronomy 6:4) that 13 refers to the
unity of "Elohim" אלהים ("God" in its Hebrew plural form as being one Lord).

The singular form of the Hebrew word "Elohim" is Eloah. "My God", in Hebrew, "my Eloah" is translated as אֱלֹהִי (elo-hi) which is singular.

Jesus' cry of "Eli, Eli, lama sabachthani?" (Aramaic for "My God, My God, why have you forsaken me?", Matthew 27:46) was a cry of anguish at his momentary separation from God the Father while bearing the curse of sin for mankind. In that moment, the perishable flesh of Yeshu was appointed to mortal destruction when the incarnation of God's only Son - the one sent by his Father, took upon himself the abhorrance of sin.

The great and eternal work of sanctification of sin was finalised on the Cross by the indwelling Spirit of God's everlasting Word. Such was the unfathomable cost to the Father's relationship with his Son, to the inseparable union of Elohim. John 14:10 says, "Don't you believe that I am in the Father, and that the Father is in me? The words I speak to you I do not speak on my own authority. The Father who lives in me does His works".

John 1:1-3 in the King James Version states: "[1]In the beginning was the Word, and the Word was with God, and the Word was God. [2] The same was in the beginning with God. [3] All things were made by him; and without him was not any thing made that was made." Hence, it stands to reason that when the Spirit of God hovered over the waters (Genesis 1:2), this was not a third person of Elohim, but a third dimension of Godhead - the spirit of "Logos", the Word.

We can qualify, and further clarify the above New Testament scripture John 1:1-3 against the claims of Genesis 1:1 in the Hebrew with the following ordinal.

"All things were created by Elohim by the Son" = 406
sys.ord 406.su 172.rd 566.rv 188.rr [1332].cs
∏(cs) = 18
∏(su,rd,rv,rr) = 3870720→2352→60→6
∏(su·rd·rv·rr) = 7430683456→1451520→200→2
∏(su,cs) = [432]

When comparing the outputs from the ordinal at the top for "In the beginning God created the heaven and the earth", we have a concordant 432 in the digital product of the .su and .cs values. Most significant here is the relationship between 432 and 1332.cs, the combined sum for "All things were created by Elohim by the Son".

1332 is Greek isopsephy for άλφα Ω "Alpha and Omega" in the book of Revelation. It is Jesus who identifies himself as the Alpha and Omega to John the apostle (writer of Revelation) through the spirit of prophecy conveyed by an angel (Revelation 22:16).

Number 432 is co-prime totient for 1332. Where 1332 is n, all numbers 1 < n sharing only 1 as the greatest common divisor are considered relatively-prime to n. This important mathematical process is known as Euler's totient function.
432 = φ(1332)

Just by looking at the digits of Revelation 22:16 we can easily produce 432 from 2 * 216, where 216 is a perfect cube (6^3). Number 216 equals ordinal for "The Messiah Son of David". The reference of number 216 to David couldn't be clearer:

REVELATION 22:16
"I, Jesus, have sent my angel to give you this testimony for the churches. I am the Root and the Offspring of David, the bright Morning Star"

The sum of integers 1-36 (6^2) equals 666.
36(36 + 1)/2 = 666

1332 = 666 + 666
We see how Alpha and Omega being the first and the last, the beginning and the

end of time, space and matter, the beginning and the end of the resurrection, the beginning and the end of God's Kingdom reign on the Earth mirrors two times 666. What was holy in the beginning shall remain holy in the end through the redemptive finishing power of the Holy Spirit. For this reason, anyone who takes the mark of the idol shepherd (the false christ, the beast) blasphemes the Holy Spirit. Attributing number 666 and its preeminent authority to Satan or to flesh (the self) is blasphemy against the Son of God, the Alpha and Omega, the Almighty.

<OPEN QUOTE GOOGLE AI>
Matthew 12:31 reads, "Therefore I tell you, every sin and blasphemy will be forgiven men, but the blasphemy against the Spirit will not be forgiven" (ESV).

In this verse, Jesus is stating that while most sins and slanderous words against God can be forgiven, a specific blasphemy against the Holy Spirit is unforgivable. This specific sin, in its immediate context, refers to the Pharisees attributing Jesus' miraculous works, done by the Spirit, to Satan, a deliberate and conscious rejection of God's power out of malice. <CLOSE QUOTE>

∏(su,cs) = 30240

It's no coincidence that 3240 below is the second recursive digital product of the Speed of Light.
What might we deduce from this? Well, noone comes to the light of the Father without first receiving the grace of forgiveness from the Son of God who made salvation from death available through the blood and resurrection power of Jesus Christ. It is by confession with words through the conviction of faith that Jesus is the Son of God and that God raised him from the dead. (Romans 10:9-13)

2^6 → 26 = "God" = יהוה "YHWH" Jehovah (Hebrew standard gematria)

6^2 → 62 = "Elohim"

6³ → 63 = "Deity"

The combined digital product of 62 and 63 equals 216.
∏(62,63) = 216 (combined sum 216.cs for "the Son", "Joseph", "Joshua", "One God")

Just as 216 * 2 produces 432, so 432 produces 864 which is a box, that is a cube by area 12² * 6. Given that Revelation is the 66th and final book of the Bible, calculating the digital product of Revelation[66] 22:16 as follows equals 864:
∏(66,22,16) = 864 = 4 * 216

When doing the same for Revelation 22:13 where "Alpha and Omega" is mentioned for the last time, the result is 432.
∏(66,22,13) = 432 = 2 * 216

Since we know that 864 relates to Ιερουσαλήμ "Jerusalem", and to the dimensions of New Jerusalem, that is 6 * 12,000² (6 * 144,000,000) square furlongs, from the area 864 millions square furlongs, we can attribute dimensions in creation to God's divine completion plan.

Area of New Jerusalem: 864,000,000 square furlongs
Sun's Diameter: 864000 miles
One day: 86400 seconds

432 + 864 = 1296

sys.ord 63.su 27.rd 72.rv 27.rr 189.cs
∏(cs) = 72
∏(su,cs) = 1296

Returning to number 137, having discussed the union between the Father and the Son present in omniscience, omnipotence and omnipresence by the Holy Spirit as one Elohim (God) we might deduce the following from the digits:

a) 1 * 37 = 37 = "begin" = ישׁו "Yeshu" Jesus of Nazareth
b) 137 = "In the beginning"
c) 13 = אֶחָד "One"
d) 13>4 (4 days of creation, 4 corners, winds)
e) 7 represents the 7 lamps of the Spirit (Revelation 4:5)

Therefore, as portrayed in Revelation 4, where "One" sat on the throne with 4 living creatures around the throne, and the 7 lamps in front of the throne, it is assumed that "in the beginning" was the throne of God and of the Son (the Lamb), accompanied by the Holy Spirit. From number 411 "In the beginning God created the heaven and the earth" which is 3 times 137, if we imagine the 3 dimensions of time, space, and matter declaring the triune Godhead, we can form 777 (777.rv is the reverse ordinal for 411.su) and 444 (from 13>4 into a triple).

3 * 4 = 12
7 * 3 = 21

444 + 777 = 1221
12 + 21 = 33

Number33 is an odd, composite, and semiprime number, and is 33 is palindromic in both decimal and binary. It is also known for its solution in the sum of three cubes problem and for being the largest number not expressible as a sum of distinct triangular numbers.

33 is the numeric representation of the Star of David.

INTRODUCTION TO THE GREAT PYRAMID

The Great Pyramid of Giza's latitude, 29.9792458°N, is numerically identical to
the speed of light in meters per second (299,792,458 m/s). Situated at the
precise intersection of the longest line of latitude and the longest line of
longitude that can be drawn across land, the Great Pyramid was built during the
Fourth Dynasty, approximately 4500 years ago (circa 2580 BC).

Before endeavouring to explain the relevance of the Great Pyramid of Giza to
Messianic prophecy in the Bible, we need to first establish the relationship
between Jesus Christ - the incarnation of "Logos" (the Word of God) with light
as revealed by the Speed of light (in a vacuum): 299,792,458 metres per second.

In the ordinal statement below, we'll use the combined sum 1566, that is an

obvious reference to number 666 to unpack this very clearly.

"Son of Logos son of Abraham son of David son of Joseph" = 501
sys.ord 501.su 195.rd 660.rv 210.rr [1566].cs

$1566 \rightarrow 55566 \rightarrow \prod(55566) = 4500 \rightarrow (4500)_8 = (2368)_{10}$
"Jesus Christ" Ιησούς Χριστός = 2368

The digits of Speed of Light (299,792,458) form 2368 Ιησούς Χριστός as follows:

 2 99   79245   8
[2] 99>18>[9]+[27]<79245 [8] → [2] [36] [8] → 2368

Additionally, we want to show that the Great Pyramid is a token of God's given
dimensions for the Earth. For a start, we need to connect the Creator with the
Word in relation to Genesis 1:1, the Creation. The Hebrew gematria from the
Torah:

Genesis 1:1 = בראשית ברא אלהים את השמים ואת הארץ = 2701
296 407 395 401 86 203 913
In the beginning God created the heavens and the earth.

Ιησούς Χριστός = $(2368)_{10}$ = $(4500)_8$
The conversion process for the Greek 2368 decimal (base 10) to 4500 octal (base
8) reveals the constructs of Genesis 1:1 in the Hebrew. Herein is evidence of
God revealing the mystery of Creation to the Gentiles. These values are
observed by
recursively dividing each whole number part by 8 after processing the
remainders. Repeat each step until the result is zero. The output for each
step is as follows:

2368 / 8 = 296 (0 remains)
296 / 8 = 37 (0 remains)
37 / 8 = 4.625 → (6+2+5 / 8) = 1.625 → 1625>14>5 (5 remains)
4 / 8 = 0.5 → (5 / 8) = 0.625 → 625>13>4 (4 remains)

The remainders are ordered in reverse i.e. 0054 becomes 4500.
37 = ישו "Yeshu" Jesus (Hebrew ordinal) = "begin" = "let"
296 = ישוע המשיח הוא התגלמותו של דבר יהוה =
"Jesus Messiah is the embodiment of Jehovah's word"

It's no coincidence that 2368 + 296 + 37 = 2701 (Genesis 1:1).

Genesis 1:1 is a complex sentence with a main clause containing a nominal
predicate (A noun predicate consisting of a subject and and object), and an
independent adverbial clause. We are clearly told WHEN (the adverbial clause),
WHO (the nominative/subject), and WHAT (the accusative/object) in the main
clause.

Hebrew gematria for "In the beginning" (913 + 203) equals 1116. This is the
adverbial clause. Significantly, these digits can form 9, 18, 27, 36, 117 and
216. From these numbers, an array of compelling alpha-numeric and mathematical
relationships can be exposed, but for now, we'll concentrate on the digital
product of the combined numbers listed.

$\prod(9,18,27,36,117,216) = 1,524,096$

First, if we identify the 666 (note that 111 * 6 equals 666) in the number from
the pairings 15,24,96, the sum is 135. Considering that 45 + 450 + 4500 (the
octal translations of the decimal divisions by 8 for 2368 (37,296,2368) equals
4995, which is also the sum of 111 + 222 + 333 + 444 + 555 + 666 + 777 + 888 +
999, the sum of these digits equals 135. Ok, but what about the 4? The 4
itself refers to what was created in the beginning (4 days of creation before
man), but the beginning itself is the Son of God, who together with God the

Father since the beginning forms Elohim (The Hebrew states Elohim, number 86 who is the plural "God").

Next, since we know that the palindrome triples 111-999 are composites of Jesus Christ 2368, we must also be aware that number 37 (which is 10, which is 1) is a divisor of the palindromes, given that 111 equals 37 * 3. As such, each palindrome can be produced from 37 and a multiple of 3 (by 1-9). It's no coincidence that the number 1369, which is the square of 37 (37²) reflects 19 and 36. From 1116 "In the beginning" we see 36, and from the main clause 1585 "God created the heavens and the earth" we see the digit sum 19. By adding 1369 to its co-prime totient (all numbers 1 < n relatively-prime with n i.e. sharing only 1 as the greatest common divisor with n), that is 1332, the sum is 2701.

1369 = ורוח א־להים מרחפת על פני המים "And the Spirit of God moved upon the face of the waters" (Genesis 1:2)
φ(1369) = 1332 = (666 + 666) = άλφα Ω "Alpha and Omega" (Revelation 1:8, 21:6, 22:13).
1369 - 1332 = [37]
1332 = 37 * 36
37 + 36 = [73]
37 * 73 = 2701

From the ordinal value above, we see the digital sum of the Speed of Light in the reverse reduction value 55.rr. We also see a compelling resemblance to 1116 ([9],18,27,[36],[117],[216]) where the sum of 9,36,117,216 equals 378, that is the combined sum 378.cs of "I am the Word". This is significant as 37 * 8 equals 296 יהוה "the earth", and 37 * 80 equals 2960 "Son of Man" Υἱὸς τοῦ Ανθρώπου. The sum of divisors 80 (from Son of Man) and 36 (from Alpha and Omega) equals 116. Adding 1116 and 116 equals 1232, an analogy to 1332 Alpha Omega where the middle digits 2 and 3 multiplied equal 3 and 3 added. And so, we know that number 162 is also an expression of 1332.

∏(1,524,096) = 2160

2160 points to Speed of light (299,792,458 m/s) in the following way:
299,792 → 299,792>38>11>[2]
458 → ∏(458) = [160] = "The Throne of God"

299 * 792 = 236808
Revealed very cleary here is the Greek isopsephy 2368 for Ιησούς Χριστός "Jesus
Christ".
2368 * 8 = 18,944
18 + 944 = 962 = לעולם יהוה דברך נצב בשמים "Forever Jehovah your word stands in
heaven" (Psalms 119:89)
2368 / 8 = 296 = יהוה "the earth" = "the good shepherd giveth his life"

108 + 458 + 64 = 630 = "The Righteous Word of the Truth is the creation of God
the Son"

From the ordinal below for "The Son", it is evident that number 2160 means just
that. Adding 21 to 60 equals 81, and 216.cs is the combined sum. We know that
number 216 is a perfect cube (6³), and also the totient of 666.

∏(su,cs) = 288

Number 423 can be unfolded various ways into various numbers, and quite
intuitively into 2368 Ιησούς Χριστός "Jesus Christ". Using a symmetrical
approach:
2   =   [2]
4 * 3 =   12>[3]
2 * 3 =   [6]
2 * 4 =   [8]
From 222 we can derive [2 * 3 = 6] and [2³ = 8] from two and three.

423 also expresses deity as [4+2] [3] → 63.

"deity" = 63

∏(su·rd·rv·rr) = 3306744→6048→192→18→8
∏(su,cs) = 1296

Moreover, when interpreting 423 as 42 * 3, we find a compelling relationship between numbers 126, 1296, and the Speed of Light (299,792,458 m/s). In other words, light is deity.
∏(299) = 162 = "Mouthpiece of God" = "Israel is the rod" (Jeremiah 10:16)
∏(792) = 126 = "King of Israel" (John 1:49)
∏(458) = 160 = "the Throne of God" (Hebrews 12:2)

When forming 396 from 1296 → [1+2] [9] [6], multiples of 396, that is 1, 2, and 4 produce the same digital products as the separations of millions, thousands, and hundreds in Speed of Light:
∏(396) = 162
∏(792) = 126
∏(1584) = 160

162 + 126 + 160
"The Word is the beginning and the end of the Cosmos" = 448 <<<
"I am the Alpha and the Omega" = 187 (801.cs)
∏(187,801) = 448 <<<

448 = "Messiah King" מלך משיח

Moreover, the depth of 423 is apparent in that 666, signing both the beginning and the end of Christ's dominion over the Earth and this temporary Universe (1332 άλφα Ω = 666 + 666):
423 → [4+2] [4+2] [4+2] → 666

Significance of 42 * 3:
42 sums to 6. Man was created on the 6th day. God rested on the 7th day.
Numbers 6 and 7 are factors of 42, and also addends of 13 אֶחָד "One" in Hebrew.

"Hear, O Israel: The Lord our God is ONE Lord" (Deuteronomy 6:4 KJV)

42 = 3 * 14 (דוד "David" = 14)

[1] There were "42 journeys of the Israelites".
This refers to the 42 encampments detailed in the Torah portion of Parshat Masei, documenting the Israelites' path from Egypt to the Promised Land.
[2] Matthew 1 lists 3 sets of 14 generations from Abraham to Christ.
[3] Daniel 12 lists 1260 days of tribulation (42 months being 3.5 prophetic years of 360 days).

Note the reverse gematria above 585.rv for "The Son" (423.su) which appears in number 1585 of the Hebrew gematria "God created the heavens and the earth".
This number 585.cs is the combined sum for "Jesus the Nazarene".

Next, the digital product of the product of factors 423, 27, 585, 27, equalling 180,394,695 reveals Jesus Christ - the Son of Man who is the incarnation of the Son in the resulting number, 233280.

181440 is perhaps the most revealing signpost of any single number to both the
Speed of Light and to the dimensions of the Great Pyramid. Moreover, we have an
inference to 6³ (216) in the 18, followed by 1440 minutes in a day, thereby
expressing all 3 physical dimesions of Creation, that is time, space, and
matter. However, a 4th dimension is expressed by the 6³ (216) in reference to
the Creator, the Son, in the beginning.

The number 374 is interesting, particularly for this discussion pertaining to
the Great Pyramid and the geneaology of Christ, the Messiah.  First, we have a
reflection of two numbers, 37 and 74 which sum to 111.
37 = יֵשׁוּ Yeshu "Jesus" (Hebrew Mispar Siduri / ordinal) = "begin" = "let"
(Genesis 1:1 = 37 * 73 in Hebrew)
74 = "Christ"

Since 37 * 40 equals Χριστός "Christ" and 37 * 4 equals 148 "The Passover", with
1152 as the combined sum of the English ordinal calculation, where 1152 is the
co-prime totient of Ιησούς Χριστός 2368 "Jesus Christ", the numbers agree
undeniably across 3 languages.

Significantly for the Messianic discussion, the sum of 37 is 10.  That forms 14
from 374 which also sums to 14 (374>14).  The number 14 is the Hebrew gematria
for דוד " David" Messiah King, i.e. dalet=4, vav=6, dalet=4.  Hence, 464 is a
popular Hebrew code for The Messiah, son of David, seated on the throne of
David.

Summing 374 in stages:
3>[3]
37>[10]
374>[14]

Evidently, we see the first 4 digits of pi 3141, but also 31104 which is twice
15552, a most compelling number relating to the Son of God being the Alpha and
Omega, the Messiah.  Given that 555 sums to 15, we see that number 1152 is an
anagram of 15552, being 15 in 12.

"The firstborn of all creation" 555 = בבכר לכל נברא
"Mashiach ben Yoseph" 555 = מָשִׁיחַ בֶּן־יֹוסֵף  (Messiah from Joseph)

From digits 3141 we also see the formation of number 315.

∏(su·rd·rv·rr) = 36774483742→18966528→207360→252→2
∏(su,cs) = 6804

At this stage, the above statement may seem strange, or unqualified, but as
we'll see many times over from the data contained in this paper, there is ample
evidence against the convential belief that the Great Pyramid was super-humanly
conceived and designed by the ancient Egyptians. It is my earnest intention to
show from the evidence available that the Great Pyramid, in location, dimension,
period, and geometric form contains compelling Messianic coding. It's worth
noting that the current year 2025 in itself bears witness to various significant
facts and events:

2025 is a square year in that it is 45²
The digital product of 2025 and the previous square year 1936 equals 3024. This
matches the second recursive product of the Speed of Light: ∏(299,792,458) =
3265920→3240 = ∏(1936,2025)
In July 2025 the Sun completed its 11-year solar cycle marked by fluctuating
sunspot numbers and the complete flipping of its magnetic poles. The appearance
of a large coronal hole near the sun's equator during this phase is considered
unusual.
ScanPyramids researchers presented novel results in March 2025 that involved
merging data from ground penetrating radar, ultrasonic testing, and electrical
resistivity tomography at the Chevron to create detailed composite images,
advancing the understanding of this previously hidden structure.

Shifting back to number 374, the sum of 14 is perhaps more revealing and telling
of the connection between the Great Pyramid and the Messiah that we may
understand at first. In the simplest terms, 14 is 5 which is formed from 4 and
1, and 41 is formed from 37 + 4. As I write these words it becomes clear to me
that number (su,cs) יִשְׂרָאֵל derives from these numbers. In fact, 14 + 41 equals
55, the sum of the Speed of Light, while 144 is Hebrew ordinal for ישוע האל הכול
יכול "Jesus Almighty God" and 441 is Hebrew gematria for אֱמֶת "Truth".

Moreover, "The Word of God" דבר אלוהים in the Hebrew Gematria system equals
298, a signpost to Jesus Christ and to light:

The digits of Speed of Light (299,792,458) form 298 and 2368 Ιησούς Χριστός as
follows:

2   99   79245   8
[2] 99>18>[9]+[27]<79245 [8] → [2] [36] [8] → 2368
[2]   36>[9]   [8] → [2] [9] [8] → 298

Imagine the top view of a pyramid. There is a square with a centroid, right?
Remember that Χριστός "Christ" has factors 37 and 40 and Jesus was tested for 40
days and 40 nights in the desert. "The Passover" is 37 times 4. so the sum of
digits is 14 "David" and 37 + 4 equals 41, the generations of Christ counted in
Matthew 1:1.

Now, we have an ambiguous, yet fundamental relationship between the 3 groups of
14 (Shakkai is 314, pi = 3.14...) which makes 42 generations, whereas, one group
contains only 13 generations. Now, we know that 13 is gematria for אֶחָד " One"
and 14 is דוד " David", so plotting of two of 14 and one of 13 forms a string
214113. "Throne of David" equals 141, so by adding the sum of 2 and 13 (6) to
141 we get 147 which is the height in metres of the Great Pyramid.

Since we know that 411 is the ordinal for Genesis 1:1 in the King James Bible,
from 214113 we can separate 411 and add the digital sum of 21 and 3 (6) to form
417:

∏(su,cs) = 336

"fulness of the Godhead in bodily form" = 336 (Colossians 2:9)

We can also clearly see that "Yeshu Hamashiach is the incarnation of Logos" has
a combined sum 1413.cs, the first 4 digits of pi, in reverse order.

From the same statement we see the number 204 as the reverse reduction 204.rr.
Remarkably the following ordinal relative to the geneaology of the Messiah is no
coincidence.

So why might there be only 41 generations instead of 42 listed? Were there not
42 journeys made by the Israelites in the wilderness? Will there not be 42
months of great tribulation? Afterall, 41 is 5 and 42 is 6. There are 6
creation days, not 5. Well, because Christ is both 5 and 6.
5 * 6 = 30
5 + 6 = 11
30 + 11 = 41

The soldiers divided Jesus's outer garments into four pieces, one for each of
the four soldiers, but the tunic, which was seamless and woven from a single
piece, was not divided. (John 19:23-24). This amounts to 5 pieces.

Jesus sustained at least five major wounds: one each to his right hand, left
hand, right foot, and left foot from the crucifixion nails, and one to his side
from a Roman soldier's spear. (John 20:24–29)

Jesus fed the crowd of 5000 with 5 loaves of barley and 2 fish.

While considering all of the above, the most compelling explanation for the
unfinished set of 13 generations (instead of 14), lies in the fact that these
were the physical generations.

MATTHEW 1:17
"17 So all the generations from Abraham to David are fourteen generations; and
from David until the carrying away into Babylon are fourteen generations; and
from the carrying away into Babylon unto Christ are fourteen generations."

As it was the group "the carrying away into Babylon unto Christ", which has the

missing generation, it seems logical that for the purpose of emphasizing deity,
Christ being God is son of the one who sent him. He is the Son of God.

EXODUS 4:22 Berean Standard Bible
"Then tell Pharaoh that this is what the LORD says: 'Israel is My firstborn
son,"

Note the wording of Matthew 1:1: "The book of the generation of Jesus Christ,
the son of David, the son of Abraham." Yes, of course there were generations
before the patriarchal era, (around 20 since Adam), but the focus here is on the
birth of the nation of Israel. The writer Matthew is showing the Jews that a
repetition of 14, 3 times proclaims "David Messiah King!"

JOHN 3:16
"For God so loved the world that he gave his one and only Son, that whoever
believes in him shall not perish but have eternal life."

Jesus Christ, the son of David, the son of Abraham, [the son of God]. There are
42 generations including the omission as Jesus had two fathers - one earthly and
one heavenly.

The Great Pyramid of Giza's latitude, 29.9792458°N, is numerically identical to the speed of light in meters per second (299,792,458 m/s).

Situated at the precise intersection of the longest line of latitude and the longest line of longitude that can be drawn across land, the Great Pyramid was built during the Fourth Dynasty, approximately 4500 years ago (circa 2580 BC).

The Great Pyramid was built before the patriarchal period of Abraham - before Moses and the Israelites. However, the speed of light is coded in the straight-line distance between Giza and Megiddo (Armageddon) Israel which is 299.36 miles.

The speed of light is absolutely loaded with coding and this is only one such one example, but significant nonetheless. Some 1000 years after the completion of the Pyramid, the Israelites escaped the oppression of Pharaoh. And ironically, it was to Egypt where Joseph and Mary fled with the infant Jesus some 1510 years after the exodus to escape the persecution of Herod, king of Judea who ordered the massacre of all children two years and under. Their return would have been around 4 BC when Herod died. An angel appeared to Joseph telling him to take Mary and the child into Egypt (Matthew 2:13).

Based on biblical accounts and scholarly analysis, Job likely lived before Abraham, before the time of the patriarchs.
The Book of Job doesn't mention the Mosaic Law or the Israelites, which are central to later biblical narratives. This suggests Job lived before these events.

WHO BUILT THE GREAT PYRAMID?

The "Great Pyramid" was built during the reign of Cheops, and Herodotus tells us that it took the labor of 100,000 men 20 years to build it, and that during its building the idol temples of Egypt were closed. Manetho, an Egyptian priest, records how at that time-"the Deity was displeased with us; and there came up from the East in a strange manner, men of an ignoble race, who had the confidence to invade our country and easily subdued it by their power without a battle. And when they had our rulers in their hands they demolished the temples of the gods." This state of things continued during the reign of Cheops and his successor, but when Mycerius, or Mencheres, began to reign, he re-opened the temples, and restored the worship of the gods. Manetho styled these kings, "HYKSOS" or "Shepherd Kings," who were reputed to be Arabians, that afterward left Egypt in large numbers and went up to Judea and built a city named Jerusalem.

Herodotus tells us that they called the pyramids after "PHILITION," a shepherd who at that time fed his flocks about the place. This "PHILITION," or "PHILITIS," appears to have been the Architect of the Great Pyramid. He was an Arabian, but went up to Philistia in Judea with those who went up, and was known in Manetho's time as "PHILITION," the Philistine. Who then was "PHILITION"? Some have identified him with Shem, others with Melchisedec, but the writer believes he was "JOB." Job was the greatest man in the East, or Arabia. Job 1:3. His age (he lived to be nearly 250 years old) places him back before the days of Abraham (B.C. 2000), who lived to the age of 175 years, and locates him as living at the time when the Great Pyramid was built. And in the 38th chapter of Job, the Almighty speaks to Job as if he was the identical person who built the Great

Pyramid, laying its foundations, and placing its "Capstone" in position, while the people shouted for joy. That Job had great meteorological and astronomical knowledge is clear from the way God spoke to him about the snow (vs. 22), and the rain vs. 25-28). and the ice (vs. 29:30). and the heavenly bodies (vs. 31-32), and the weather probabilities (vs. 33-34), and electricity (vs. 35), and there can be no question but what God would impart to such a man as Job, who was so God-fearing and spiritual, that he was both a prince and a priest, all the Scriptural and prophetical knowledge that is embodied in the arrangement of the passageways and chambers of the Great Pyramid. It does not follow. however, that Job knew the symbolic meaning of the construction of the Great Pyramid any more than the Prophets understood their prophecies. 1 Pet. 1:10-12. The Almighty may have given to Job the plan of the Great Pyramid, as Moses was given the plan of the Tabernacle and its furnishings on Mount Sinai.

There is no question but what the people of Job's day were well versed in the mechanic arts. It was not long after the Flood, and the skill of the artizans of Noah's day, and of the Babel builders had not been lost. This is evident from the Temples and Palaces of Egypt that were built in those days. But the Great Pyramid was unlike any of them. It was a new kind of Architecture, the first of its kind, and such as the world had never seen before. The plainness of its outlines, and the slope and smoothness of its sides. and the absence of all ornamentation, was a striking contrast to the Egyptian style of Architecture. Whence came it? It must have come from some source not Egyptian. Why? Because there was a purpose in its building. It was built to record mathematical, astronomical, and Scriptural knowledge, that should bear witness to the inspiration of the Scriptures in these last days. That accounts for its peculiar architectural shape, and the character of its inferior construction. To that end it was sealed up that in the closing days of this Dispensation it might disclose its message to an unbelieving world."

The Great Pyramid of Giza's latitude, 29.9792458°N, is numerically identical to the speed of light in meters per second (299,792,458 m/s).

Situated at the precise intersection of the longest line of latitude and the longest line of longitude that can be drawn across land, the Great Pyramid was built during the Fourth Dynasty, approximately 4500 years ago (circa 2580 BC). Ra, a major deity in Egyptian religion, was worshipped from around that time during the Old Kingdom period. The earliest written evidence of deities dates back to the Early Dynastic Period (c. 3100–2686 BC).

The date of Exodus of Israelites from Egypt is 31 March 1513 BC ~ 3(su,cs) years ago (according to reliable sources). This means the Great Pyramid was built around 1000 years before the exodus.

The number 15552 and its divisors are ubiquitous throughout the English ordinal
and gematria studies of the Great Pyramid in relation to the Word of God. This
number is powerfully indicative of the Son of God who is the Word of God, who is
the Jewish Messiah, who is Jesus Christ, who is the Alpha and Omega. Since we
know that Elohim, the plural union of Father and Son created the Universe
through the Son (the beginning of all time, space and matter) by the Holy
Spirit, the ∏(su,cs) product of the above English gematria for Genesis 1:1 (King
James Version) manifests John 1:1 and Colossians 1:6 'loud and clear'.
Colossians 1:16 states that all things were created through Jesus Christ and for
his purpose. It highlights the centrality and preeminence of Christ in creation,
emphasizing that he is both the agent and the ultimate goal of all that exists.

In Job 38:4, God challenges Job by asking, "Where were you when I laid the
foundations of the earth? Tell me, if you have understanding." This question
highlights God's creative power and sovereignty, emphasizing the vast difference
between God's knowledge and Job's limited human understanding. It's a reminder
that God is the ultimate creator and sustainer of the universe, and that humans
should approach Him with humility and awe.
Job 38:4-5 - "Where were you when I laid the earth's ...
The verse serves as an introduction to a series of rhetorical questions that God
poses to Job, showcasing His wisdom and power in creation. These questions are
not meant to be answered by Job, but rather to demonstrate the vastness of God's
knowledge and the limitations of human understanding. The questions about the
foundations of the earth, its dimensions, and other aspects of creation, are
meant to show Job the futility of questioning God's ways and to encourage him to

trust in God's sovereignty. <END QUOTE>

Before exploring some remarkable correlations between the Great Pyramid of Giza
(Khufu's pyramid, widely heralded as the holy grail of geometry among atheists,
intellectuals and mystics alike), let's first put the number 155520 into context
of the true Creator and the Creation. For a start, we see the palindrome 555
surrounded by digits 120. We need to look at number strings as phrases,
anagrams, and analogies in order to better understand codings and what the
numbers might be pointing to. By faith we have certainty in supernatural
revelation of the Holy Spirit that God the Creator (Elohim) through his Word,
that is the Son by whom all things have been created, has embedded his
fingerprint indelibly on the universe. The realm of empirical science provides
boundless testimony to this fact for anyone earnestly exploring the concordances
between language and numbers affirmed by Scripture. Upon the premise that every
creation by man, made in God's image, is merely an expression of God's creative
DNA, the vast scope of language, science, humanities, and theology are all
inextricably related and cross-validating of each other.

Note that while 15552, 155520, and 1555200 are essentially the same symbolically
where spurious digits can be ignored for the purpose of reduction, these powers
of 10 are significant, not only in quantity, but also in structure. This
becomes important when adding segments of a multi-digit together by separation,
such as thousands, hundreds, and tens. The totients (count of all integers 1 <
n co-prime with n) of powers of 10 usually don't match by digital arrangement.
The same applies to their squared and cubed roots. And again, while squaring
powers of 10, the digital arrangements don't change, but the extra zeros alter
the separation.

First, let's explore numbers by separation:
15,552 → 15 + 552 = 567
155,520 → 155 + 520 = 675
1,555,200 → 1 + 555 + 200 = 756

The Great pyramid has 4 sides with a width of 756 feet at the base.

567 + 675 + 756 = 1998 = בראשית ברא אלהים את השמים In the beginning God created

756 - 675 = 81 = "The Son" = 5 + 76
675 - 567 = 108
81 + 108 = 198 = "The Resurrection"
1998 + 198 = 2196
The square of 2196 is 4,822,416
4 + 822 + 416 = 1242 → 1 24>[6] 2 → 162 = ∏(299)
"Mouthpiece of God" = 162

From number 162 we can explode into 1[33]2 and 1[555]2 where 33 and 555 both
reduce to 6.
1332 is άλφα Ω "Alpha Omega" (Revelation 1:8; 21:6, and 22:13).

∏(837) = 168 = "Israel restored"
8 * 37 = 296 = "the good shepherd giveth his life" John 10:11

168 + 296 = 464
464 is דוד " David" (dod) King Messiah

And in a nutshell, time moves from the foundations of the creation towards the
pinnacle event which is the Second Advent of the Messiah, the son of Joseph, son
of David, son of Abraham, son of God. In the promised days of the Lord (the
Harpazo, Second Coming, dissolution of the Earth), the Lord gathers his flock
from the four corners of the Earth and the heavens (skies), in the same way he
gathers the scattered people of Israel from among the nations and unites Judah

with Israel in restoration of the whole house of David. In the current generation of the Earth, there is a Sun, a moon and the oceans. The throne of the invisible God is in Heaven, overlooking the Earth. In the era before the Son of Man, the tabernacle was at the foot of the mountain (Sinai, representing the Old Covenant). The tabernacle of the Lord is now among men, upon the rock of Zion, the holy dwelling place of the Father (The New Covenant which is consecrated by the blood of Yeshua, that is Christ the Messiah). This transformation in relationship between God and men has been forged by the indwelling of the Holy Spirit.

As such, for the redeemed in Christ, the metaphorical pyramid represents the consummate fulfilment of God's promises, beyond redemption from the existing universe wherein the Kingdom of God will come to the Millennial Earth, and traverse into the next creation - the eternal state. The future holy city, New Jerusalem descends out of heaven onto Mount Zion like a bride adorned for her husband. The pyramid reminds us to look upward until the resurrection as the throne of God and the Lamb will be established in the very presence of God's people. There will be no Sun and no moon as the Lamb will be the light of the Holy City - a majestic cubed structure without a temple (as the holy city itself is the tabernacle). The light of the city will beam onto the nations of the saved, and living waters will flow from the Throne through the tree of life. The foundations and the ceiling of the cube are equally proportionate, unlike the pyramid which is directional and transitory.

REVELATION 22:1-6 NKJV
"And he showed me a pure river of water of life, clear as crystal, proceeding from the throne of God and of the Lamb. In the middle of its street, and on either side of the river, was the tree of life, which bore twelve fruits, each tree yielding its fruit every month. The leaves of the tree were for the healing of the nations. And there shall be no more curse, but the throne of God and of the Lamb shall be in it, and His servants shall serve Him. They shall see His face, and His name shall be on their foreheads. There shall be no night there: They need no lamp nor light of the sun, for the Lord God gives them light. And they shall reign forever and ever. Then he said to me, "These words are faithful and true." And the Lord God of the holy prophets sent His angel to show His servants the things which must shortly take place."

Such is the will and the divine plan of the Almighty God as stated clearly and beautifully in the Bible.

On the contrary, the pride and accomplishments of carnal men are frivolously finite. For the denier of the one true God, the pyramid celebrates no more than the wisdom and determination of human civilization (and any notions of the super-human genius of the Ancient Egyptians is debunked in this paper). At best, it's awe-inspiring and marvellous, but ultimately useless and hopeless to any mortal heading towards his inevitable demise. Abundant with layered underground structures, ornamental chambers, and said to have been finished with exterior gold-plated limestone, the pyramid has lasted until its destined timescale, having held a record for over 3800 years as being the tallest building in the world. However, it contains the dead, who contrary to secular beliefs are not simply at rest in regal surroundings, and the physical degradation - however well-preserved over centuries testifies to its mortality.

For even the destiny of the unrighteous Jew is stated in the final chapter of Daniel's prophecy:

DANIEL 12:1-3
"1 At that time Michael, the great prince who protects your people, will arise. There will be a time of distress such as has not happened from the beginning of nations until then. But at that time your people—everyone whose name is found written in the book—will be delivered. 2 Multitudes who sleep in the dust of the earth will awake: some to everlasting life, others to shame and everlasting contempt. 3 Those who are wise[a] will shine like the brightness of the heavens, and those who lead many to righteousness, like the stars for ever and ever."

Next, let's look into more of the mathematical phenomena confirming the divine design and purpose of the Great Pyramid. As we'll see just by scratching the tip of the iceberg, there is more than sufficicent correlative data by which to attribute the mysteries and wonders of the Great Pyramid to supernatural intent.

Aside from the notable construction challenges faced by a workforce circa 4500 years ago, where astounding precision could be achieved when handling blocks of around 50 tons in weight to achieve a height equivalent to 18% of the Burj Khalifa and just under 50% of the Eiffel Tower, the most compelling mystery lies in the proportions. The earliest accurate calculation of pi (π) was by the Greek mathematician Archimedes of Syracuse around 250 BCE, who determined the value of pi to lie around 3 1/7 (approximately 3.14285), very close to 22/7.

As if it's not remarkable enough that the height of the Great Pyramid is evidently proportional to its base perimeter to the ratio of a circle's radius to its circumference, the margin of precision is within 0.04% when using modern-day pi, precise to the 9th decimal digit (3.141592654). That's nothing short of miraculous! Oh, let's not forget to state the dimensions given in royal Egyptian cubits.

Height = 280 cubits
Base side = 440 cubits
Base perimeter = 1760 cubits

Base perimeter / height = 2pi = 360 degrees

57.295779513082 deg = 360 / 2pi = 1 radian

Some arguments relating to the Great Pyramid coding Earth's dimensions and also its precession (gyration) on its axis may disagree on scaling factors, but regardless of the differences, they are certainly close. Gravitational influences from the Sun and Moon are responsible for this phenomenon causing the north pole to orbit its own axis every 26,000 years. NASA reports the precession of Earth as 25771.5 days. Considering the figure 2,952,100 being the metric volume of the Great pyramid, it's not difficult to understand why researchers have been intrigued by the closeness of the digits, regardless of the factor 100.

100 = "Messiah King" מלך משיח (Mispar Siduri)

While volume and precession units are seemingly unrelated, they have more in common than we might realise at first glance. When comparing the difference between NASA's published figure and 2,592,100 / 100 (29521), the difference is only 0.57675244010[648]%, which multiplied by 100 closely resembles 1 radian. Now, assuming it's not meant to be 1 radian, and that NASA is 100% correct, we can nevertheless retrieve a creation code as follows:
576 + 752 + 44 + 1 = 1,373

One base side of 756 feet is 63.62433862433862% of the height of 481 feet.

∏(63.62433862433862) = 2,579,890,176
2 + 579 + 890 + 176 = 1,647

Number 1647 is analogous with 1476, where 147 alludes to height and 6 alludes to
base.

If we review the dimensions of the Great Pyramid, the following 2 statements are
profoundly concordant with the base and height measurements. In the first
statement "Mount Zion", the ordinal sum is 147 which matched the metric height.
In the second statement "The Great Pyramid foundations were laid by the Holy
Spirit", the combined sum is a compound of 147 metric height and 60, which
reduces to 6 for the metric perimeter of the base. Where each base side equals
230, the digital product of the perimeter 230 times 4 i.e. 2 × 3 × 4 = 24
reduces to 6.

In the first statement "Mount Zion", the combined digital product of the (su,cs)
equals 756 which is the length in feet for each side of the base of the Great
Pyramid. Mysteriously, the height is revealed in metric whereas the base is
revealed in feet. Given that the (cs) and (su,cs) are peculiar to the system
design of the calculator, the data for the base would be undisclosed in a
nominal ordinal or gematria calculation.

Let's explore the relationships between the square of 9 multiplied by 2 in series. These numbers are ubiquitous throughout this study. One notable example is in the sum of 5184 (the co-prime totient of 15552) and the following 2 squares, 20736 and 82944 that equals 108864.

20736	2304	* 9 = 144²
41472	4608	* 9
82944	9216	* 9 = 288²

(9 + 18 + 36 + 72 + 144 + 288)² = [567]
81 + 324 + 1296 + 5184 + 20736 + 82944 = 110,565
110 + 565 = [675]
Significantly, 20736 which is the square of 144 forms [756] = 20 + 736
567 + 675 + 756 = [1998] = 555 + 666 + 777

In the range shown, 81 is the square of 9 which cannot be halved into an integer, unlike the following 10 numbers in the series. Note that 2592 (totient of 2701, the Creation) sits equidistant between 81 and 82944. With 5 numbers on either side there is a suggestion of 55 where the speed of light digits sum to 55. A further concurrence of 55 is found in 2368, where the sums of pairs 23 and 68 each reduce to 5 recursively. The speed of light is significant, not only in the spiritual sense where Jesus claimed "I am the Light of the World" (John 8:12), but also in the physical relationship between the speed of light and the laws governing atomic matter in quantum space (see Planck constant and fine-structure constant). As asserted by Max Planck, father of energy quantization and quantum physics, all evolving matter exists by virtue of a cohesive intelligent force - from the smallest atom to the largest solar system.

"Since there exists in the whole universe neither an intelligent force nor an eternal force, and humanity has not succeeded in discovering any long-awaited cause of perpetual motion—so we must hypothesize a deliberate intelligent spirit behind this force. This spirit is the foundation of all matter. A visible but

not corruptible matter is real, true, authentic, because matter without the spirit cannot be—but the invisible, immortal Spirit is the reality! Also since a spirit cannot exist by itself, but every spirit belongs to an entity, we are forced to assume that there exist spiritual beings. However, since spirit beings cannot come into being by themselves, but must be created, so I am not shy to designate this mysterious creator, as him, whom all civilizations of the earth have called in earlier millennia: God!"

Where 481 feet is the height and 756 is the width of the base of the Great Pyramid:

The sum of the integers from 1 to 481 is 115,921. *
The sum of the integers from 1 to 756 is 286,146. *

By calculating the volume of the Great Pyramid from these integer sums:

(115,921 * (286,146)²) / 3 = 3,163,852,460,508,012³

3 + 163 + 852 + 460 + 508 + 12 = 1998 = "In the beginning God created the heavens".

Specifically, the area of one wall of the cube-shaped New Jerusalem is 144
million square furlongs, and the area of all six sides is 864 million square
furlongs. This number, 864, also corresponds to the diameter of the sun. The
number 864,000 miles is the diameter of the sun (NASA). This amounts to 864

The number 1458 has a curious resemblance to the last 3 digits of speed of light
299,792,458. However, there is no logical or seemingly apparent method of
reducing digits 299,792 down to 1. By adding 1000 to 1458 we have 2458 which
can easily be related to speed of light through recursive addition:
```
299>20>[2] 792>18>[9] 458>17>[8]
2 + 9 = 11>2
```
We see a relationship between 298 with 2368 (Jesus Christ):
```
2 36>[9] 8
```

In fact, the aliquot sum of 2368 (sum of all proper divisors) is 2458.
```
σ1(2368)-2368 = 2458
2 45>[9] 8
```

For both 2368 and 2458, summing the inner and outer 2 digits provides compelling
results.

The accepted height and base measurements for the Great Pyramid, in antiquity
are (Levy 2007):

• Height: 280 cubits
• Base side: 440 cubits
• Perimeter: 1,760 cubits

These measurements reveal that the pyramid was constructed with the geometry of
a circle, with the value of π. Where π equals (to the most significant digit)
3.1415926.

Where the height of 280 cubits is the circle radius, the circumference of the
circle equals the perimeter of exactly 1,759.291856 cubits. That is c = 2r(π).
Before converting cubits to metric measurements, let's find the digital product
of c.

∏(1,759) = 315

∏(c) = 1,360,800
1 + 360 + 800 = 1161

In the calculation below by Thomas W. Schroeder / November 7, 2019, A Critique
of Graham Hancock's Forced Numerical Relationship between the Great Pyramid of
Giza and Earth's Dimensions, the figure 2,638,100 million cubic meters has a
curious resemblance to the number 2368 and 2,592,100.

Volume of the Earth = 1.08321 * 10²¹ cubic meters (exact modern measurement) = v
Volume of the Earth divided by v * [43,2]00 cubed: 1.08321 * 10²¹ cubic meters /
(16/π * 43,200³) = 2,638,100 million cubic meters

Number 2368 is Greek isopsephy for Ιησούς Χριστός "Jesus Christ". In this
number we can see compelling codings of speed of light (298) and of the Earth's
rotation angle (23.5 degrees):

1. 299>20>[2] 792>18>[9] 458>17>[8]
2. 2368 → 23 68>14>[5]

The combined digital product of 1 and 2 is 4320.
∏(298,23.5) = 4320

∏(su,cs) = [43200]

43200 is the widely-accepted scaling factor of the pyramid to the dimensions of
Earth.

Given that 2368 is Ιησούς Χριστός and 2592 is the co-prime totient of Hebrew
gematria value 2701 Genesis 1:1, while both the values 2,638,100 million cubic
meters and 2,592,100 million cubic meters share the trailing 100, they are
clearly anagrams of 2368 and 2592.

Remarkably, the discrepancy between 2,638,100 (Schroeder) and 2,592,100 (the
cubed metric volume of the Great Pyramid) is only 1.743679163034%. While in
differential terms this is only marginal, the digits of the difference reveal an
irrefutable correlation. Arguably, this is by divine intent and can thus code
2701 as follows:

Divide 2,638,100 and 2,592,100 each by 100 and remove the trailing 1.
2. 2638 - 2592 = 46 = "Creator" (46.rr)
3. 2592 - 2368 = 224
4. 46 + 224 = 270 = "Creator" (270.cs)

Below is a digit reduction model of the Great Pyramid in metres where the
rounded height as an integer (necessary for ordinal calculations) has been
adjusted (by only a fractional amount down to 146.54).  This dimension maintains

```

756 is the measurement in feet for each of the base sides of the Great Pyramid.
Since both 146 and 147 reveal compelling information, taking an average between
the two would seem logical as a starting point. Thus, 146.5 is mathematically
precise, and sums recursively to 7, but 146.54 seems more compelling given that
the digits can form 464 and 15. These digits sum to 9 which completes a set.

464 i.e. דוד "David" King Messiah (dalet=4, vav=6, dalet=4)
555 = Mashiach ben Yoseph מָשִׁיחַ בֶּן יוֹסֵף (Messiah son of Joseph, Hebrew Atbash)
555 = בבכר לכל נברא " The firstborn of all creation" (Mispar Hechrachi i.e.

Moreover, 146.5>16>[7] with 4 appended forms 74 "Jesus".

∏(su·rd·rv·rr) = 1688236→13824→192→18→8
∏(su,cs) = 224
```

From the ordinal above, we see 180 (equals pi radians) and 224, the co-prime totient of 464.

Given that the perimeter should be relative to a circle's circumference, the perimeter and the height should scale proportionately. As a rule of thumb, working with a rounded base side measurement of 230 metres and a height of 147 metres, scaling the height exactly to the perimeter means that the height will be under the rounded integer. As such, I have fixed the height to the intuitive value 146.54 which causes a tiny adjustment to the perimeter, allowing the volume to match 2,592,100, accurate to the third decimal place. The assumption here is that the decimal places are significant, not only for the purpose of precision, but for symbollic decoding.

But first, take a look at the following 2 statements and notice how strongly the numbers declare the true designer and builder of the Great Pyramid. Adding 21 to 60 equals 81 which is ordinal for "The Son". Then, from number 1296, adding 12 to 96 equals the same as multiplying its digits, equalling 108 where 108.cs is the combined sum for "God" = 26. Moreover, multiplying 12 by 96 equals 1152, the co-prime totient of 2368 = Ιησούς Χριστός "Jesus Christ".

Now, let's focus in on just a limited selection of numbers from the Javascript output (bottom of the document).

First, by finding the percentage difference between the fixed height and what the precise height would be according to pi, in relation to the perimeter, we recursively reduce the digits to the value between the parentheses {}. This means 60 and 108.

Next, the digital reduction from the pyramid volume calculation is remarkable in
that the full complement of digits 2592100.000164522 reveals (at least):
∏(25921) = 180 (degrees, 180.cs = "Logos" i.e The Word)

864 is a cube where the area of one wall of the cube-shaped New Jerusalem is 144
million square furlongs, and the area of all six sides is 864 million square
furlongs. This number, 864, also corresponds to the diameter of the sun. The

∏(su,cs) = 3780

From the gematria above we have 3780 (∏(307,1656)) which equals the digital
product of 1 radian that is 57.296 degrees.
∏(57.296) = 3780
37 * 80 = 2,960 = Υἱὸς τοῦ Ανθρώπου "Son of Man" (Matthew 16:13)

From the ordinal below we have 1134 (∏(91,297)) which is an anagram of pi, i.e.
3.141... radians which equals 180 degrees. Note from the gematria above that
the digital product of the combined sum (1656.cs) equals 180.

In the Hebrew Mispar Musafi system of gematria, כֹּחַ " power" equals 37. The
English gematria value 307 can be considered a code for both 37 AND 73 (factors
of the Creation gematria 2701 for Genesis 1:1 in Hebrew) where 30 + 7 equals 37
and 70 + 3 equals 73 when read in reverse. Remember that Hebrew reads from
right to left whereas English reads from left to right. The Hebrew ordinal for
ישו "Yeshu" is 37, and where 3 + 7 equals 10, there are 10 words in the Creation
verse Genesis 1:1. In Hebrew this amounts to 28 letters (28>10), and the
recursive sum of all gematria from all words is 37 (which is 10, which is 1).
The multiplicative digital product of the words equals 64000, where 64 is
ordinal for "Israel", which is also 10. Thus, factors 37 and 64 produce 2368
Ιησούς Χριστός "Jesus Christ". Given that the digital sum of 2368 equals

```
ordinal 19 for "Adam", ∑(37) * ∑(64) * ∑(19) = 1000.

The Valley of Jehoshaphat means "Yahweh judges" or "God has judged". Its
contemporary name is the Kidron Valley.  While the armies of the world will be
assemble at Megiddo (Armageddon), it is further south towards the Mount of
Olives in the Kidron Valley where the final battle will take place.

Joel (Joel 3:2 and 3:12): "I will gather together all nations, and will bring
them down into the valley of Josaphat: "Then I will enter into judgment with
them there", on behalf of my people and for My inheritance Israel, whom they
have scattered among the nations and they have divided up My land."; "Let the

Jehoshaphat, for there I will sit to judge all the nations on every side". This
location is also referred to as the Valley of Decision.

Patmos to Great Pyramid, Giza, Egypt: 574.25 miles
Patmos to Megiddo, Israel: 589.26 miles

The average distance between Patmos to Great Pyramid, and between Patmos to
Megiddo is 581.75 miles. The digital products of the shorter distance and the
average distance each amount to the identical value.
∏(574.25) = ∏(581.75) = 1400

The following (below) is a conceptual, symmetrical isosceles triangle intended to indicate the closeness in relative dimension to the above triangle based on the geographic coordinates of Giza (Great Pyramid), Megiddo, and Patmos. Given that the ratio of sides of the geographic triangle sides to the base is very close to 2:1, the super-imposed scaled-down dimensions of a:216, b:216, c:108 visually reveal the close relative symmetry of the geographic triangle to the isosceles triangle. We can see how the mean of differences at the base centralises at the median line of the base.

While fear of the unknown leads to anxiety, fear of the Lord in faith leads to
wisdom. The Lord knows our hearts, and by repentance forgives our ignorance,
our mistakes, and leads us in paths of righteousness and peace. He is the good
shepherd who gives his life for his sheep. He is the loving and obedient son
who gave up his glory next to the Father and humbled himself unto to lowest,

most grievous entity of all - death. He is faithful to his people, and true to his word. He is the resurrection and the life. In him there is no darkness at all because he is the light of the world. He conquers evil and makes all things new into eternity. He is the the light of our salvation, the bright and morning star. He is the very essence and fulfilment of time, space and matter - the origin, and the conclusion. The Great Pyramid in the desert is the sundial of the Great God, and an oasis of life for those who receive him.

[20] But now is Christ risen from the dead, and become the firstfruits of them
that slept.
[21] For since by man came death, by man came also the resurrection of the dead.
[22] For as in Adam all die, even so in Christ shall all be made alive.
[23] But every man in his own order: Christ the firstfruits; afterward they that
are Christ's at his coming.
[24] Then cometh the end, when he shall have delivered up the kingdom to God,
even the Father; when he shall have put down all rule and all authority and
power.
[25] For he must reign, till he hath put all enemies under his feet.
[26] The last enemy that shall be destroyed is death.
[27] For he hath put all things under his feet. But when he saith all things are
put under him, it is manifest that he is excepted, which did put all things

ADDENDUM
06/09/2025

This section includes further ideas informed by the 2-dimensional geometry of
the Great Pyramid unfolded flat with all triangles pointing outwards from the
base. A square is circumscribed around the vertices of the triangles. A circle
is then circumscribed around the square. The altitude measurement of the side
triangles was not covered in the original discussion.

GREAT PYRAMID
Height: 147 metres
Altitude of Side: 187 metres
Base Side: 230 metres

CIRCUMSCRIBED SQUARE
Side: 427.4462 metres
Diagonal: 604.500 metres = 427.4462 * √2

"The Messiah King" 262 = מלך המשׁיח (Hebrew Atbash)
Notably, 262 is the metric height of the Great Pyramid, plus half of the base.
This means that by projecting an inner right-angle triangle from the floor to
the pinnacle, the vertical side opposite the hypotenuse is 147 metres, with a
base of 115 metres. The ratio between the vertical side and the hypotenuse is
proportionate to phi (the Golden Ratio φ = 1.618033...) to the square root of
phi (√φ = 1.272019260860[464]). Number 464 represents דוד "David"
(dalet(4),vav(6),dalet(4)) King Messiah.

We'll expose the digital product of C (1899.09275909503 metres) in stages.

Remarkably, the digital products of the first two iterations (648 and 5832) are
also the digital products of the differences between 999 and 100, and 9999 and
1000. Where 999 is the largest 3-digit integer, 1000 is the smallest 4-digit
integer.

∏(1899) = 648
∏(1899.09) = 5,832 → (5 + 832) = 837

This totient encodes the Great Pyramid dimensions most clearly (by a factor of 10).
The accepted dimensions in antiquity (Royal Egyptian cubits):

Height: 280
Base side: 440
Base perimeter: 1760 = 440 * 4

1760 / 280 ≈ 2π rad = 360°
176 / 28 ≈ 2π rad = 360°

The sum of 6723 and its totient 4428 is astounding.

SIGNIFICANCE OF 262 TO PI, PHI, E, GAMMA CONSTANTS

The first 262 decimal digits of π, φ (Golden Ratio), e (Euler's number), and γ (Euler-Mascheroni) all sum to 1192. These are the most important irrational universal constants used in mathematics and physics.

How can we relate this phenomenon to the Great Pyramid? Well, we already see evidence of 262 present in the pyramid's dimensions, and by enumerating the following phrases, there is a profound connection to number 1192.

1192 = 2 * 596

∏(su·rd·rv·rr) = 29495053024→388800→1536→90→9
∏(su,cs) = 43200

<OPEN QUOTE Google AI>The "43200 scaling factor" suggests that if you multiply
the Great Pyramid's base perimeter by 43,200, you get the Earth's equatorial
circumference, and if you multiply its height by 43,200, you get the Earth's
polar radius. The number 43,200 is also thought to be derived from the 43,200
seconds in half a day, linking to astronomical cycles.<CLOSE QUOTE>

43,200 is half of 86,400 seconds in a day.
1440 minutes are in a day.

It is thanks to the insightful findings of Rob Slattery and John Elias (leaders
in the field of Bible-based gematria) that the 262-digit summation in Pi, Phi,
and E are known, and therewith a significant value from the phrase found in 1
Corinthians 11:24, "This is my Body". The original Koine Greek isopsephy for
these words, Τοῦτό μού ἐστι τὸ σῶμα equals 3576 which is three times 1192.

Since we now know that the same value 1192 is also found in Gamma, the Euler-
Mascheroni constant, we can multiply 1192 four times and investigate its
potential significance.

1192 * 4 = 4768

∏(4768) * √2 = 1,900.70302782944 = 1344 * √2

13 * 44 = 572
5 * 72 = 360 (5 times 72°)
360° = 2π

The angle of 72° refers to each exterior angle of a regular pentagon, which can
be found by dividing the total 360° of exterior angles by 5 (the number of
sides). In a pentagram (a star polygon derived from a pentagon), these 72°
exterior angles of the underlying pentagon relate to the angles of the five
isosceles triangles that form the pentagram, where 72° is also the vertex angle
of these triangles.

From 1344 we can form 444.
4³ = 64 = "Israel"

Remarkably, multiplying 444 by the square root of 2 is almost equal to 2π.
4.44 * √2 ≈ 6.28 ≈ 2π

44 * 4 / 0.444444444 = 396.000000396

"The Father dwells within Mount Zion" = 396 (1116.cs)
"I the LORD, the first, and with the last; I am he" (1314.cs, Isaiah 41:4 KJV)
"My God is Yeshu Hamashiach the King of kings" = 396 (1332.cs)
"A new heaven and a new earth replaces the first" = 396 (1404.cs)

∏(396.000000396) = 26244

How might we relate 262 and 1192 to 26244?

1192>13>4

4 append 44 → 444 (1344)

An curious connection between 864, the speed of light, and number 262 can be found in Gamma (γ = 0.5772156649...), the Euler-Mascheroni constant.

864 occurs 104 times within the first 100,000 digits (decimal places)
864 occurs 1008 times within the first 1000,000 digits (decimal places)
864 occurs 10025 times within the first 10,000,000 digits (decimal places)

Notably, the sum of occurrences equals 11,137, where 137 equals "Great Pyramid", and "In the beginning", while 111 / 37 equals 3. Where 37 sums to 10, 10 times 111 equals 1110, which is 2 times 555, the Mashiach ben Yoseph מָשִׁיחַ בֶּן־יוֹסֵף (Atbash).

864 * 3 = 2592 = φ(2701)

558 + 1557 = 2,115
And from number 2115 an array of declarations are evident:
2115 → 117 = "Godhead in flesh" (513.cs)
2115 → 216 = "Our Father God in Heaven" (747.cs)
2115 → 225 = "Revelation of Wisdom" (675.cs)
2115 → 315 = "THE LORD OUR RIGHTEOUSNESS" (864.cs)

513 + 747 + 675 + 864 = 2,799
∏(2,799) = 1134 (anagram of 3.141 ≈ π)
558 + 855 = 1413 (Pi in reverse → 3.141 ≈ π)

The relationship of Pi to the Great Pyramid dimensions has already been clearly
established through an abundance of scientific literature. However, to the best
of the author's knowledge, none such literature attributes Pi, or the speed of
light in relation to the Great Pyramid to the hand of God himself. Yet, the
alpha-numeric exposition of this claim is undeniably clear, and must be
considered as evidence of God's divine plan for Creation.

1134 + 1413 = 2,547 → 2 + 547 = 549
"Jehovah Tsidkenu" = 549.cs

"The Lord our Righteousness," or Jehovah Tsidkenu, is a prophetic title for the
Messiah found in Jeremiah 23:5-6 and 33:15-16. It describes a righteous king
from David's line who will bring justice, salvation, and secure peace to Israel
and Judah. Thus, adding the combined sums for "THE LORD OUR RIGHTEOUSNESS"
(864.cs) and "Jehovah Tsidkenu" (549.cs) equals 1413.
(864 + 549) = 1413 = (558 + 855)

By exploding number 558 as shown below, these numbers bear very close
resemblance to the Great Pyramid's dimensions in antiquity.

55 * 8 = 440 (Base side in royal cubits)
5 * 58 = 290 (Height in royal cubits + 10)

When calculating the combined digital products of the actual height of 280
cubits, and 440 cubits for each base side, with the outputs 440 and 290 above,
we see a clear code of revelation for both the existing creation (Genesis 1:1)
and the eternal city that is New Jerusalem.

∏(280,440) = 256 = φ(512) ← 512 = 8³ = (8 * 8 * 8)
∏(290,440) = 288 = φ(888) ← 888 = Ιησούς "Jesus" Yeshua

∏(256) * ∏(288) = 73728

73728 = 8(96²)

First, we see a code for Genesis 1:1 2701 Hebrew gematria in number 73728. The
digits 737 manifest the factors 73 and 37, while 28 represents the number of
Hebrew letters in the sentence (בראשית ברא אלהים את השמים ואת הארץ).

∏(8962) = 864 = Ιερουσαλήμ "Jerusalem"

Now, let's investigate 8962 as we know from Hebrew gematria that 962 relates to
the Word, to Logos.
962 = "Forever Jehovah your word stands in heaven" (Psalms 119:89) לעולם יהוה
דברך נצב בשמים

8 * 962 = 7,696
7 + 696 = 703

703 is the 37th triangular number which forms from the 1369 polygon (37²) that
also forms the 13th star number, 937.

1369 = "And the Spirit of God moved upon the face of the waters" (Genesis 1:2)
ורוח א־להים מרחפת על פני המים
φ(1369) = 1332 = άλφα Ω "Alpha and Omega"

1369 + 1332 = 2701 = (703 + 1998)

Genesis 1:1 = בראשית ברא אלהים את השמים ואת הארץ = 2701

296 407 395 401 86 203 913
In the beginning God created the heavens and the earth.

The sum of integers from 1-703 equals 247,456
703(703 + 1)/2 = 247,456
247 + 456 = 703 = "the heavens and the earth" (407 + 296)

The sum of integers from 1-1998 equals 1,997,001
1998(1998 + 1)/2 = 1,997,001
1000 + 997 + 1 = 1998 = "In the beginning God created the heavens" (913 + 203 +
86 + 401 + 395)

Where the 13th star number 937 forms from two 703 triangles:
∏(937) = 189
"Deity" = 63 (189.cs)
"Mercy" = 64 (189.cs)
"Curse" = 66 (189.cs)
"Cross" = 74 (189.cs)

9 * 37 = 333
"Mount Zion" = 147 (333.cs)
"The Father" = 91 (333.cs)

Ιησούς Χριστός "Jesus Christ" = 2368
"I am" = 23
"Logos" = 68

2701 - 2368 = 333

The first letter of the Hebrew alphabet is Alef (א), and the last is Tav (ת).
Letters את equalling 401 in Genesis 1:1 are untranslated. Why? Surely, this is
the very first reference to the Alpha and Omega, the first and the last. He is
Jesus Christ - Yeshua Hamashiach (Messiah). He is "Logos", the Word. Thus, the
alphabet. And, from 401 we can imagine a pyramid with 4 sides and 1 pinnacle.
Jesus Christ spent 40 days in the desert where he resisted temptation.
Ιησούς Χριστός "Jesus Christ" = 2368
2368>19>[1]

"I am Alef Tav" = 693
sys.gem 693.su 36.rd 3312.rv 63.rr 4104.cs

∏(su,cs) = 2592

∏(693) = 162 = "Mouthpiece of God"
3312 is an anagram of 1332 άλφα Ω "Alpha and Omega"
63 = "Deity"
4104 is a clear code for 10 and 44, 1 and 440, 144:

"Adonai" = 44
"Judah" = 44
"Abraham" = 44

10 + 44 = 54 = "Love"

Revisiting the dimensions of the Great Pyramid in royal cubits in reference to
4104, 280 sums to 10, to 1, leaving digits 404 to remain:
Height: 280
Base: 440

280 + 440 = 720 (The sum of the hexagon's internal angles in degrees)

Number 2592 (Θεότης "Godhead" equals 592) is yet another compelling number in

correlation between God, the creation, and the Great Pyramid. As highlighted
throughout this document, 2592 is the co-prime totient of 2701, and appears in
the metric measurement of the Great Pyramid's volume: 2592100 cubic metres
(147(230²)/3).

100 = "Messiah King" מלך משיח (Mispar Siduri)

2592100 - 2592 = 2,589,508
∏(2,589,508) = 28,800
28 + 800 = 828
"Throne of his father David" = 235 (828.cs)
"The Throne of God in Israel" = 247 (828.cs)

2592 = φ(2701) = 4 * 648
648 = φ(703) = φ(1998)

648 = "The Messiah, the King, on the Throne of David" מלך המשיח על כסא דוד

As we know that 464 (visible in 4 * 648) represents דוד "David" King Messiah,
lets multiply 464 by 8.
464 * 8 = 3712

37 * 12 = 444 = "The light declares the shekinah Glory of the Lord"
444 + 333 = 777 = "In the beginning God created the heaven and the earth"
(777.rv, Genesis 1:1 KJV)

On either side of number 401 את are two flanking values, 1202 ("In the beginning
God"), and 1098 ("created the heavens and the earth").
1098 + 1202 = 2,300

Notably, 401 and 68 both reduce to 5, where 2300 appears to be a platform for
number 2368 Ιησούς Χριστός.
401>5
68>14>5
Significantly, 5 + 5 equals 10, and 55 is the digital sum of 299,792,458 (speed
of light).
The rotation angle of the Earth's axis rounds to 23.5 degrees.

"The Word of God" דבר אלוהים in the Hebrew Gematria system equals 298, a clear
signpost to Jesus Christ and to light.
The digits of Speed of Light (299,792,458) form 298 and 2368 Ιησούς Χριστός.

2   99   79245   8
[2] 99>18>[9]+[27]<79245 [8] → [2] [36] [8] → 2368
[2]   36>[9]   [8] → [2] [9] [8] → 298

σ1(2368)-2368 = 2458 (aliquot sum of 2368 i.e. proper divisors only)
299>20>2
792>18>9
2 + 9 = 11>[2] 458 → 2458 ← 299,792,458

Finally, referring back to numbers 256 and 288:
∏(280,440) = 256 = φ(512) ← 512 = 8³ = (8 * 8 * 8)
∏(290,440) = 288 = φ(888) ← 888 = Ιησούς "Jesus" Yeshua

512 * 888 = 454,656

454 + 656 = 1110
1110 / 2 = 555

555 = "In the beginning God created the heaven and the earth with his son"
555 = "The firstborn of all creation" כֹּר לְכָל נִבְרָא
555 = "Mashiach ben Yoseph" מָשִׁיחַ בֶּן־יוֹסֵף

45 + 46 + 56 = 147 = the height in metres of the Great Pyramid
"Mount Zion" = 147

And like a boomerang, the numbers keep coming back to 15552. While 555 is
evident, what about the 12?
147>[12]

12 * 15 = 180
180 degrees = 3.141592654... radians ≈ π
"Judah" = 44 (180.cs)
"Logos" = 68 (180.cs)
"Jesus" = 74 (180.cs)

The gematria declares the Creator.
